**Floating  
Directional  
Mixers**

**S&N  
AIROFLO**

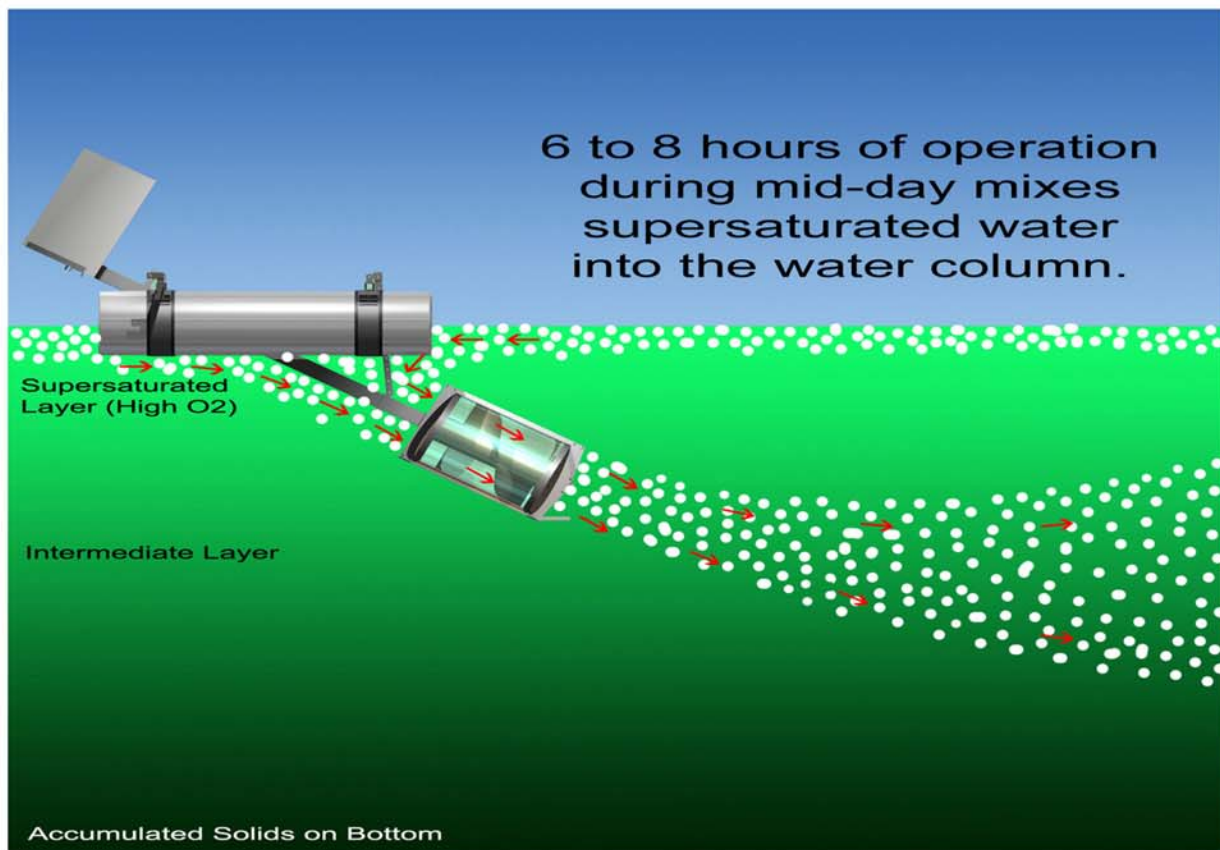

**S & N Airoflo, Inc.  
MAXFLO MIXER**

**Save energy by applying S&N Airoflo's low speed, low HP mixers, with high pumping rates and directional flow.**

## ***APPLICATIONS:***

- \* Improves the performance of facultative lagoons by reducing algal growth, odor, short circuiting, and build-up of sludge and floating debris.
- \* Enhances the performance of your floating aerators in applications where mixing dominates.
- \* Anoxic mixing for denitrification in the activated sludge process.

- \* 3 and 5 HP models
- \* Flow rates from 8,000 to 10,000 GPM, depending on HP and RPM
- \* Wastewater lubricated bearing
- \* Units easily removed for service
- \* Optional EZ-Access features for maintenance
